3. Continue to read the instructions for predictions #3 and #4 and then remove the appropriate cards.

4. After the fourth prediction, the Library card will be the only card remaining, and the one your friend will always end up on. Say, "I told you I would read your mind FIVE times and then help you discover the best value on the planet." Turn the Library card over to reveal the clock as you say, "The "fifth time" is the TIME you spend at your Library...and the Library is the best value on the planet!...Do you know why the library is the best value around?...Because it combines all of these unique places into one single location. Point to the cards that have been removed. "The big difference is that when you visit any of these places, you'll 'pay' some of this"...turn the cards over to reveal the dollar bills "...but the only thing you'll 'spend' at the library is time, and time spent at your library...is always time well spent!"

Have fun presenting this amazing magic trick to your family and friends. It's a wonderful way to promote the True Value and Real Magic that you'll discover at your library.
